

Above's Agricultural Technology Platform Raises Industry Bar for Transparency & Traceability Standards in Regenerative Agriculture

REGINA, Saskatchewan - August 24, 2022 – Above Food Corp. (Above Food) is pleased to announce the expansion of its regenerative agriculture platform developed to commercialize and validate emerging technologies in seed, soil, food safety and advanced genetics through the integration of Discovery Seed Labs Ltd. (Discovery Seed). Discovery EARTH Sciences Inc. (Discovery) now has increased capability of testing, certifying, and auditing for all the regenerative agricultural practices utilized in the Above Food value chain.

Above Food's integration of Discovery Seed, facilitates an enhanced technology and human resource capability in the utilization of proprietary genetic, soil and seed genomics, that are used to yield healthy and whole nutritious foods, while supporting a healthier, sustainable EARTH.

Discovery combines the pedigree, human resources, and technology of Discovery Seed Labs Ltd., founded in 1994, with the regenerative production protocols developed by the Above Food founders, to create, validate, and facilitate North America's most advanced regenerative agricultural production platform.

Discovery will provide growers and ingredient companies with unparalleled testing, authentication, and evaluation services for Above's three regenerative supply chain platforms: Regenerative Organic, Gluten Free and Natural Regenerative. All of these in turn, gives Above Food even more custody over the quality, nutritional value, and functionality of the ingredients that they grow, sell, and use in their own plant-based products.

"The expansion and acceleration of Discovery's regenerative agricultural platform provides Above Food an opportunity to provide Above Food's IPElite™ Grower Producers the tools and technologies to implement regenerative agricultural practices through proprietary soil and seed testing technologies and focused genomics. This leaves our consumers and vendors with a trusted and certified stamp of comfort in knowing their products are being produced through a regenerative and environmentally sustainable process, every step of the way, from seed to dinner plate," said Lionel Kambeitz, Executive Chairman, CEO & Co-Founder, Above Food Corp. "This addition provides a platform bringing all the necessary disciplines together to create a stronger, more secure, vertically integrated supply chain."

ABOUT ABOVE FOOD CORP.

Above Food is a plant-based food company that knows nothing is above nature. It's why we look to nature first to guide and inspire our seed-to-fork journey. We go above and beyond the plant-based food industry norm in every aspect of our business. It's this spirit that leads us to pursue *only* real innovation, real nutrition, real transparency, real traceability, and real efficiencies.

Founded in Canada by food production ecosystem veterans and visionary co-founders, Lionel Kambeitz, Donato Sferra, Tyler West and Martin Williams, Above Food's vision is to create a healthier world — one seed, one field, and one bite at a time.

With a complete chain of custody of plant proteins, enabled by scaled operations and infrastructure in primary agriculture, processing and specialty ingredients, Above Food delivers food to businesses and consumers with unparalleled traceability, quantifiable sustainability and superior nutrient density. Above Food's portfolio of brands include [Culcherd](#), [Eat Up!](#), [Farmer Direct Organic](#), [Loma Linda](#), [Neat](#), [New Ocean](#), [NorQuin](#), [Modern Menu](#) and [TUNO](#). They are available online at shop.abovefood.com and in grocers across North America.
